Patient Attachment Bonus Search – OSCAR PRO

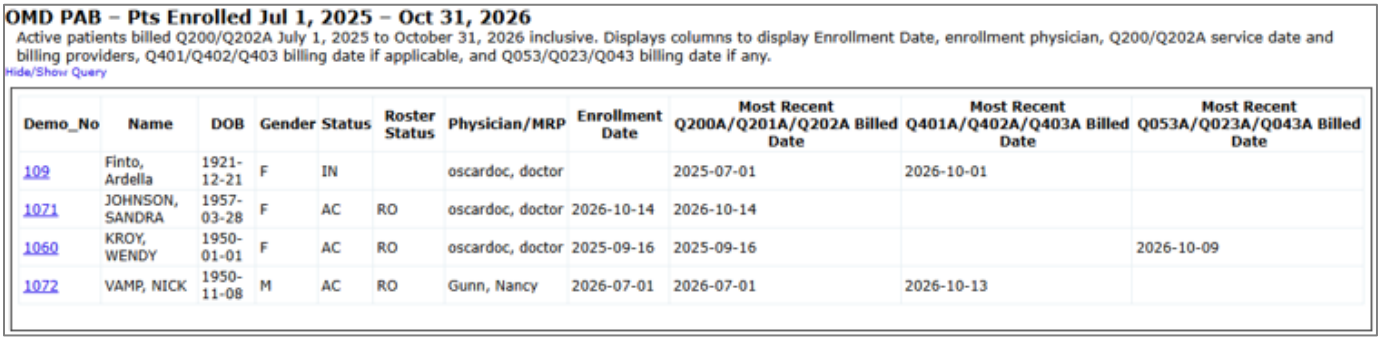
OntarioMD (OMD) has developed an OSCAR Report by Template (RbT) to help physicians identify patients for review of potential patient attachment bonus eligibility.

The Report by Template (RbT) identifies patients who:

- Have a Q200A, Q201Aor Q202A billing code dated between July 1, 2025, and October 31, 2026, inclusive.

The RbT results also include columns displaying:

- **Most recent de-roster code date:** The date of the patient's most recent de-roster billing code (Q401A, Q402A, or Q403A), if applicable, to support review and validation.
- **Most recent unattached patient billing code:** The date of the patient's most recent Q023A, Q043A or Q053A billing code, if any.
- **Patient status:** Patients who were enrolled during the specified timeframe but have since been marked inactive or deactivated in the EMR will still appear in the search results. Review these patients to determine whether they meet the bonus eligibility requirements.



OMD PAB – Pts Enrolled Jul 1, 2025 – Oct 31, 2026

Active patients billed Q200/Q202A July 1, 2025 to October 31, 2026 inclusive. Displays columns to display Enrollment Date, enrollment physician, Q200/Q202A service date and billing providers, Q401/Q402/Q403 billing date if applicable, and Q053/Q023/Q043 billing date if any.

IMPORTANT NOTES

- **Verify RbT results:** Results rely on the completeness and accuracy of recorded EMR billing and/or demographic data. Physicians should verify the accuracy of the results.
- **Confirm eligibility:** The RbT identifies patients for further review but does not confirm eligibility for a patient attachment bonus. Physicians should review relevant patient records and confirm eligibility against current guidance before submitting claims.
